

RAIL PROFESSIONALS JHL

The Rail Professionals JHL is part of the Trade Union for the Public and Welfare Sectors (JHL) in Finland. We are a joint organization which means our members are the local branches whose members work in rail transportation sector.

This sector includes jobs like train personnel (except train drivers), train and track maintenance, railway logistics, rail building, tram, and subway traffic to mention just a few. Overall, we have approximately 3200 members whose collective agreement we monitor and negotiate, together with the Trade Union JHL.

Our value base is open, member-oriented, and effective advocacy. We actively cooperate with rail companies, public authorities, and other rail lobby organizations.

Our aim is to achieve an equal and fair working life in all areas of rail transport through active and transparent action, to develop cohesion in the rail sector to grow the organized workforce and to have a positive impact on the economic, green transition and social development of the rail sector both nationally and within the EU level.
